Analisi COVID-19 - Federico

March 19, 2020

1 Analisi Covid_19

Analisi a livello regionale:

- Ogni regione grafico singolo
- Todo: aggiungere mortalità per regione ##### Analisi a livello nazionale
- Casi totali Italia
- Aggiungere proporzione guariti/terapia intensiva

TODO:

- Generazione giornalieria automatica
- Devo aggiustare il codice che è disordinato e senza commenti
- Scrivere un Readme.md come si deve

[92]:
```
# Importo librerie e apro primo .csv (livello regionale)

import pandas as pd
import matplotlib.pyplot as plt
import pylab
df = pd.read_csv('COVID-19/dati-regioni/dpc-covid19-ita-regioni.csv')
```
